Dentist in Hawthorn | Core Dental Glenferrie

Canonical: https://www.coredental.com.au/locations/glenferrie/

Details:

Core Dental Glenferrie is our purpose-built dental practice at 827 Glenferrie Road, Hawthorn, opened in 2026. We provide general, cosmetic and restorative dentistry, Invisalign, dental implants and dentures for patients of all ages in Hawthorn and the inner east. We are open Monday to Friday 8.00am to 6.00pm and Saturday 8.00am to 1.30pm. Call us on 03 7035 1506 or book online. Treatment suitability and results vary for each person.

Where is Core Dental Glenferrie?

We are at 827 Glenferrie Road, Hawthorn VIC 3122, on the ground floor at the corner of Glenferrie Road and Barkers Road. We are in the middle of Hawthorn's Glenferrie Road shopping strip, surrounded by shops, cafes, restaurants, medical services and public transport, so a dental visit is easy to fit into your day.

Our patients come from Hawthorn, Kew, Camberwell, Malvern, Toorak and the wider inner east. We opened this practice in 2026 as one of our nine Core Dental clinics, bringing our local approach to a busy, well-connected part of Melbourne.

Address	827 Glenferrie Road, Hawthorn VIC 3122

Group phone	13 13 16

What are our opening hours at Glenferrie?

We are open six days a week.

Day	Hours
Monday to Friday	8.00am to 6.00pm
Saturday	8.00am to 1.30pm
Sunday	Closed

Our weekday hours suit before-work and after-work appointments, and our Saturday morning hours suit families. We reserve appointments each day for dental emergencies whenever possible. If you have a chipped or broken tooth, a severe toothache, swelling or bleeding gums, call us early so we can assess you promptly. Call 000 immediately for uncontrolled bleeding, difficulty breathing or swallowing, or a serious facial injury.

How do you get to us by public transport, and where can you park?

Our practice is easy to reach by public transport.

Train: Glenferrie Station is about a 10 to 15 minute walk from the practice. It is served by the Belgrave, Lilydale and Glen Waverley lines.

Tram 16: this tram runs along Glenferrie Road, with a stop near the Riversdale Road intersection (Stop 70), a short walk from our door.

Trams 70 and 75: these trams run along Riversdale Road. Get off at Stop 32 (Glenferrie Road), then walk south along Glenferrie Road for about 2 to 3 minutes.

For parking, there is timed street parking along Glenferrie Road and the surrounding side streets. Please check the signs carefully, because time restrictions apply, and allow enough time for your appointment. Our practice occupies the ground floor of the building. If you have a question about getting to us, call 03 7035 1506 and our team will help.

What is inside our Glenferrie practice?

We designed our Glenferrie practice with comfort in mind. It is a purpose-built space with three surgeries, modern dental technology and a calm, welcoming feel that helps reduce dental anxiety. The site was a long-standing dental practice, and we renovated it fully to Core Dental standards before we opened.

Across our practices the standard surgery fit-out includes digital X-rays and intraoral cameras, ceiling-mounted screens with streaming during treatment, a Sonos audio system, and HICAPS for on-the-spot health fund claiming. Our clinicians also keep up with ongoing professional development so our care stays evidence-based.

Which dentists work at our Glenferrie practice?

Our Glenferrie team brings together experienced general dentists. Peer review and case discussion between our practitioners at all Core Dental clinics are part of how we plan treatment.

Team member	Role	Qualifications
Dr Scott Krause	General Dentist	DDS (LLU)
Dr Joanne Ong	General Dentist	BHlthSciDent/MDent (La Trobe)
Dr Maria Blanchard	General Dentist	BDC (ADC)

Some of our dentists also see patients at other Core Dental clinics. You can check any practitioner's registration on the AHPRA register at ahpra.gov.au, and you are welcome to ask us who will provide your care when you book. Team composition changes over time, so please confirm the clinician you want to see when you make your appointment.

Which treatments can you have at Glenferrie?

At our Glenferrie practice we offer:

General dentistry : dental check-ups , hygiene appointments , fillings and restorations , root canal therapy , tooth extractions , wisdom tooth removal and sport mouthguards

Emergency dentistry , with appointments reserved each day wherever possible

Cosmetic and restorative dentistry: composite and porcelain veneers , dental crowns and teeth whitening

Invisalign clear aligners

Dental implants

Dentures

If it has been a while since your last visit, we will do a comprehensive examination, including a professional scale and clean where appropriate. Regular check-ups and cleans help detect problems early and can help avoid more extensive treatment later. Whether a treatment suits you depends on an examination, your dental and medical history and, where relevant, imaging. Your dentist will explain the alternatives, the material risks, what recovery and maintenance involve and the expected cost before treatment begins.

How do payment plans, health funds and the Child Dental Benefits Schedule work at Glenferrie?

We believe quality dental care should be accessible to everyone. Before we recommend any treatment, our dentists assess your oral health, explain your options and answer your questions, and we give you a written treatment plan and quote before treatment starts so there are no surprises.

We offer interest-free payment plans through Payright, for amounts up to $20,000 over 3 to 30 months with fortnightly repayments. Applicants need to be 18 or over, an Australian permanent resident with identification and a verifiable email address and mobile number, and approval is subject to Payright's assessment. TLC personal loans from $2,001 to $50,000 over up to 84 months are also available, with the interest rate set by credit assessment.

HICAPS claiming is available on-site, and we are a preferred provider for HCF, CBHS and NIB. We bulk bill eligible children aged 0 to 17 under the Child Dental Benefits Schedule. Eligibility is determined by Services Australia, so please confirm it before the appointment. Fees depend on clinical complexity, treatment time, materials and the treating clinician, so ask us for a quote.

What does Hawthorn mean to us?

Glenferrie Road is one of Melbourne's busiest local shopping streets, and we wanted to be a practical part of that community. We are close to where people already shop, study and work, with trains, trams and street parking nearby. We want families, professionals and students in the inner east to have a dentist they can reach easily, who explains each option and quotes clearly before treatment starts.

Dental care in Victoria: what is available locally and who it is for

Wherever you live in Victoria, there are two systems — private practices and a public network — and the published description of the second one is clearer than most summaries.

Where public services operate. The Victorian Department of Health: "Public dental services are provided through the Royal Dental Hospital Melbourne (RDHM) and more than 40 integrated and registered community health services and Aboriginal Community Controlled Health Organisations across Victoria."

More than forty services across the state, not one hospital.

Who is eligible. "All children aged 0-12 years"; "young people aged 13-17 years who hold a healthcare or pensioner concession card, or who are dependants of concession card holders"; "people aged 18 years and over, who are health care or pensioner concession card holders or dependants of

concession card holders"; "all children and young people in out-of-home care provided by the Department of Families, Fairness and Housing (DFFH), up to 18 years of age (including kinship and foster care)"; "all people in youth justice custodial care"; "all Aboriginal and Torres Strait Islander people"; "all refugees and asylum seekers."

Who is seen sooner. "Victorians who have priority access to dental care are offered the next available appointment for general care. They are not placed on the general waiting list." The groups: "Aboriginal and Torres Strait Islander people"; "children and young people"; "people who are homeless or at risk of homelessness"; "pregnant people"; "refugees and asylum seekers"; "people registered with mental health or disability services, who have a letter of recommendation from their case manager or a special developmental school."

Everyone else: "All other people seeking routine dental or denture care need to place their name on a waiting list." We are not going to state a waiting time, because the published material gives none.

For children, there is a Commonwealth scheme too. The Child Dental Benefits Schedule "covers some or all of the cost of basic dental treatments over a two year period for eligible children", where a child is eligible if "they are aged 0-17 years, are eligible for Medicare and you receive Family Tax Benefit Part A or another relevant Australian Government payment". It "can be used in the Victorian Public Dental Service or participating private dental clinics", and the Department advises checking that "the dental clinic you attend accepts the scheme (be sure to ask the clinic about any potential copayments)".

On choosing a private practitioner, the Department's suggestion is word of mouth. "Many families have a regular private dental practitioner that they visit. If you would like your child to see a private dental practitioner but you do not have a regular one, it is a good idea to ask family, friends or people in your local area to suggest someone."

And you can check any practitioner's registration independently. "Ahpra publishes an online register of all dental practitioners that provides the profession and the public with up-to-date information about a dental practitioner's registration status. This register also includes details of the specialty or specialties for dentists who hold specialist registration."

What to do before you can get to a clinic

For anyone searching locally because something has happened, the published first aid matters more than opening hours.

A knocked-out adult tooth. "If an adult (permanent, or secondary) tooth is knocked out, there is a good chance it will survive if it is put back into position straight away, and you seek professional help immediately. Every minute a tooth is out of the gum, the less chance it has of surviving."

Handle it "by the crown (smooth white part that is normally visible), not the root (yellowish pointy part)". If dirty, "gently rinse it in milk or saline for a few seconds. If this is not possible, rinse with the person's saliva". Put it back root-first, "only ... if the person is conscious", have them "hold the tooth in place by gently biting on something soft, like a tissue or a napkin", and get them to a professional immediately. If it cannot go back: "place it in milk or ask the person to spit into a clean container or plastic food wrap, and place the tooth in their saliva", and "do not use water to rinse or store the knocked-out tooth".

Never with a baby tooth. "Never try to put a baby (deciduous or primary) tooth back in the gum if it is knocked out. This can damage the developing permanent tooth underneath the gum."

A chip or crack. "Teeth that have been chipped or cracked may or may not be painful. Either way, you should see an oral health professional as soon as possible because early repair can improve the

survival of a damaged tooth."

A filling that has come out. "If part of your filling breaks off or if your whole filling falls out, see your oral health professional as soon as possible."

Signs of infection, which should not wait for a routine slot. For a tooth: "swelling of the gum near the affected tooth"; "oozing of pus surrounding the affected tooth"; "facial swelling". Around a wisdom tooth, also "swollen and sore lymph nodes underneath the jaw"; "difficulty opening the mouth and swallowing"; and "fever". Untreated, an infection "can cause an infection or an endodontic abscess (a pocket or 'blister' of pus) when it spreads into the surrounding bone which can become severe".

Two published timeframes. A mouth ulcer: "If you notice a mouth ulcer that lasts for longer than 2 weeks, get it checked by a dentist as soon as you can." Bleeding gums: "If your gums do not improve or if they keep bleeding after four weeks, see your oral health professional."

And if it has simply been a long time since your last visit. "If you have not had a dental visit for a while, it is a good idea to book one." The reason not to wait for a symptom: "Having no pain does not always mean that your teeth and mouth are healthy."

Frequently asked questions

How far is Core Dental Glenferrie from the train station?

Glenferrie Station is about a 10 to 15 minute walk from our practice. It is served by the Belgrave, Lilydale and Glen Waverley lines. Trams along Glenferrie Road and Riversdale Road also stop close to us.

Is there parking near the practice?

There is timed street parking along Glenferrie Road and the surrounding side streets. Time restrictions apply, so please read the signs carefully and allow enough time for your appointment.

Which trams stop near Core Dental Glenferrie?

Tram 16 runs along Glenferrie Road, with a stop near the Riversdale Road intersection (Stop 70). Trams 70 and 75 run along Riversdale Road. Get off at Stop 32 (Glenferrie Road) and walk south for about 2 to 3 minutes.

Do you offer Invisalign at Glenferrie?

Yes, Invisalign clear aligners are part of our Glenferrie services. Your dentist will assess your teeth and bite and explain whether Invisalign is suitable for you, along with the risks and likely duration, before treatment begins.

Can I book a dental emergency appointment?

We reserve appointments each day for dental emergencies whenever possible, so call us on 03 7035 1506 as early as you can. For uncontrolled bleeding, trouble breathing or swallowing, or a serious facial injury, call 000.

How is public dental care organised in Victoria?

"Public dental services are provided through the Royal Dental Hospital Melbourne (RDHM) and more than 40 integrated and registered community health services and Aboriginal Community Controlled Health Organisations across Victoria."

Who is eligible for it?

"All children aged 0-12 years"; young people aged 13-17 with a healthcare or pensioner concession card or as dependants; concession and healthcare card holders aged 18 and over and their dependants; children and young people in out-of-home care up to 18; "all people in youth justice custodial care"; "all Aboriginal and Torres Strait Islander people"; and "all refugees and asylum seekers".

Who is seen without joining the waiting list?

Priority access groups, who "are offered the next available appointment for general care. They are not placed on the general waiting list" — Aboriginal and Torres Strait Islander people, children and young people, "people who are homeless or at risk of homelessness", "pregnant people", refugees and asylum seekers, and people registered with mental health or disability services who have a letter of recommendation.

How long is the wait?

The published material gives none, so we are not going to quote one. It says that "all other people seeking routine dental or denture care need to place their name on a waiting list".

Is there help with children's dental costs?

The Child Dental Benefits Schedule, covering eligible children aged "0-17 years" who are "eligible for Medicare" and whose family receives "Family Tax Benefit Part A or another relevant Australian Government payment". Check that the clinic "accepts the scheme (be sure to ask the clinic about any potential copayments)".

How should I choose a private practitioner?

The Department suggests asking around: "If you would like your child to see a private dental practitioner but you do not have a regular one, it is a good idea to ask family, friends or people in your local area to suggest someone."

Can I check someone's registration myself?

Yes. "Ahpra publishes an online register of all dental practitioners that provides the profession and the public with up-to-date information about a dental practitioner's registration status."

A tooth has just been knocked out. What do I do?

Put it back if you can and get help immediately. Handle it "by the crown ... not the root", rinse it in milk or saliva rather than water if dirty, and "every minute a tooth is out of the gum, the less chance it has of surviving".

What if it is a child's baby tooth?

Do not put it back. "Never try to put a baby (deciduous or primary) tooth back in the gum if it is knocked out."

My tooth is chipped but not sore. Can it wait?

No. "Teeth that have been chipped or cracked may or may not be painful. Either way, you should see an oral health professional as soon as possible."

Which symptoms should not wait for a routine appointment?

Facial swelling, pus around a tooth, "swollen and sore lymph nodes underneath the jaw", "difficulty opening the mouth and swallowing", and fever. An untreated infection "can cause an infection or an endodontic abscess ... when it spreads into the surrounding bone which can become severe".

It has been years since my last visit. Does that matter?

"If you have not had a dental visit for a while, it is a good idea to book one", and "having no pain does not always mean that your teeth and mouth are healthy".
