Agne Diliartaite, Senior Dental Technician | Core Dental

Canonical: https://www.coredental.com.au/our-team/agne-diliartaite/

Details:

Agne Diliartaite is a Senior Dental Technician at Core Dental. Agne holds a Diploma in Dental Technology and works with our ceramists and dental technicians team, bringing expertise in dental technology and ceramics to support the restorations our clinicians plan for patients. This page explains Agne's role, what dental technicians do, how technicians and clinicians work together at Core Dental, and what to ask before treatment.

Who is Agne Diliartaite?

Agne is listed on our team page as a Senior Dental Technician in our Ceramists and Dental Technicians group. Agne's qualification is a Diploma in Dental Technology, and Agne's expertise is in dental technology and ceramic work. Our clinical team consists of dentists, hygienists and registered specialists, supported by a team of management, reception and nursing staff, and by our ceramists and dental technicians.

What does a dental technician do?

A dental technician makes and finishes dental restorations and appliances that a treating clinician has prescribed. Depending on the case, these can include crowns, bridges, veneers and dentures. A technician works from impressions, digital records or scans of your teeth and from the clinician's instructions, and the finished work is then fitted by your dentist or other treating clinician. Dental technicians do not usually see patients for treatment themselves. If you are having a restoration made, your dentist remains the person who examines you, plans your treatment and explains the options, risks and costs.

Which treatments does ceramic and technical work support?

The work of our technical team supports treatments that need a made-to-fit restoration. Examples on our website include:

dental crowns and dental bridges

composite and porcelain veneers

dentures and implant retained dentures

Not every treatment suits every person, and a clinician decides what is appropriate after an examination.

Where do you see Agne?

Agne is part of our ceramists and dental technicians team rather than a treating clinician at a particular clinic, and our team page does not assign Agne to a single practice. If you are having a restoration made at any of our nine clinics, you can ask your dentist how it will be made and who is involved. Our

clinics are Southbank , South Melbourne , Caroline Springs , Carrum Downs , Epping , Wyndham , Berwick , Bayside and Glenferrie .

How can you check qualifications and registration?

The qualification we list for Agne is a Diploma in Dental Technology. Dentists, dental specialists, hygienists and dental prosthetists are registered health practitioners, and you can check their registration on the AHPRA register at ahpra.gov.au. Our dentists and registered specialists page lists the clinicians on our team.

What should you ask before you have a restoration made?

A useful first step is to explain your concern and your goals when you book. Questions you may like to ask your dentist include:

What is the recommended restoration intended to achieve, and are there reasonable alternatives?

What material will be used, and why does it suit my tooth or my bite?

How many visits will it take, and is a temporary restoration needed?

What are the risks and limitations, and how do I look after the restoration?

What will it cost, and what payment options are available?

We give you a written treatment plan and quote before treatment starts, and we offer interest-free payment plans.

Who are Agne's colleagues?

Our ceramists and dental technicians team also includes Greg Karabasis, Master Ceramist, and Natalie Bilos, Dental Technician, who holds a Diploma in Dental Technology. Ahmed Saoud is listed as a Dental Prosthetist. All of our practitioners are members of the Australian Dental Association.

Frequently asked questions

What is Agne Diliartaite's role at Core Dental?

Agne Diliartaite is a Senior Dental Technician in our ceramists and dental technicians team. Dental technicians make and finish restorations and appliances that a treating clinician has prescribed, such as crowns, bridges, veneers and dentures.

What qualification does Agne Diliartaite hold?

Agne holds a Diploma in Dental Technology, with expertise in dental technology and ceramics, as listed on our team page. You can ask us about how a restoration is made, and your dentist can explain who is involved.

Will I see a dental technician for my appointment?

Not usually. Your dentist or another treating clinician examines you and fits your restoration, while the technician makes it from the records and instructions your clinician provides. Ask your dentist how your restoration will be made.

Does Agne Diliartaite treat patients?

Our team page lists Agne as a Senior Dental Technician, a technical role. Examinations, diagnosis and treatment planning are carried out by our dentists and registered specialists, who you can book through any of our clinics.

How do I book an appointment at Core Dental?

Call us on 13 13 16 or book online through coredental.com.au. Tell the team what you would like to discuss, and we will arrange an appointment at the practice that suits you.
