Greg Karabasis, Master Ceramist | Core Dental

Canonical: https://www.coredental.com.au/our-team/greg-karabasis/

Details:

Greg Karabasis is a Master Ceramist in our Ceramists and Dental Technicians team at Core Dental. He holds a Diploma in Dental Technology from RMIT, as listed on our team page. Greg works behind the scenes: he is not a treating dentist, so you will not usually sit in his chair. Instead, he helps make the ceramic restorations that our dentists plan for patients across our nine Melbourne clinics.

Who is Greg Karabasis?

Greg is a Master Ceramist and part of the Ceramists and Dental Technicians group on our team page. His qualification is a Diploma in Dental Technology from RMIT. We list only what is confirmed on our team page, and we would rather keep this profile short and factual than add detail we cannot verify.

What does a ceramist do for our patients?

A ceramist is a dental technician who works with ceramic materials such as porcelain. When a dentist at Core Dental recommends a crown, a veneer or another ceramic restoration, the dentist records what is needed and sends a prescription. A laboratory technician then makes the restoration to match the tooth's shape, size and shade as closely as the case allows. Your dentist remains responsible for your treatment plan, the fit in your mouth and your aftercare.

Which treatments involve ceramic work?

Ceramic restorations may be part of the following care, depending on your examination and your dentist's advice:

Dental crowns , which cover and protect a damaged or weakened tooth

Porcelain veneers , which are thin shells placed over the front of a tooth

Dental bridges , which replace a missing tooth with a fixed restoration

Not every patient needs laboratory work, and your dentist will explain whether it is suitable for you, along with the risks, limits and costs.

Where can you see our dentists for ceramic treatment?

Greg is listed with our group team rather than a single clinic. Our dentists plan restorations at all nine Core Dental clinics, including Southbank , Caroline Springs , Wyndham and Glenferrie . Call 13 13 16 and our team will help you find a suitable appointment.

How do you check a practitioner's registration?

Dentists, dental hygienists, therapists and dental prosthetists are registered practitioners, and you can check their registration on the AHPRA register at ahpra.gov.au. The dentist who prescribes and fits your restoration is the person to check. You can also ask your dentist at any time who will be involved in making your restoration.

What should you ask before ceramic treatment?

What is the restoration intended to achieve, and are there reasonable alternatives?

Which material is suggested for my tooth and bite, and why?

How many visits will it take, and what is the full quote?

What are the risks, limits and likely maintenance over time?

We quote before treatment starts so you can decide with a clear plan in front of you.

Who works alongside Greg?

Greg is part of our technical and prosthetic team. You can read about our colleagues Agne Diliartaite , Phey Penayi , Alessio Pecorella and Ahmed Saoud , or browse our dentists and registered specialists .

Frequently asked questions

Is Greg Karabasis a dentist?

No. Greg is a Master Ceramist with a Diploma in Dental Technology from RMIT. He makes ceramic work for our dentists to prescribe and fit, and does not diagnose or treat patients as a dentist does.

Can I book an appointment with Greg?

Appointments at Core Dental are booked with our dentists, hygienists and specialists. If you need a crown or veneer, book with a dentist at any clinic and they will arrange the laboratory work if it suits your case.

Which Core Dental clinic is Greg at?

Our team page lists Greg with our Ceramists and Dental Technicians group rather than a single clinic. Call us on 13 13 16 if you have a question about how laboratory work is arranged for your treatment.

Does a ceramist work out my treatment plan?

No. Your dentist examines you, plans your treatment and explains the options, risks and costs. The ceramist makes the restoration to your dentist's prescription.

Who is Greg Karabasis at Core Dental?

Greg Karabasis is a Master Ceramist in the Ceramists and Dental Technicians team at Core Dental. He holds a Diploma in Dental Technology from RMIT, as listed on our team page, and works on ceramic restorations for our dentists.

What qualification does Greg Karabasis hold?

Our team page lists Greg Karabasis with a Diploma in Dental Technology from RMIT. We publish only the qualifications shown on our team page, so we do not add further detail about his background.

What does a Master Ceramist do at Core Dental?

A ceramist makes ceramic dental restorations such as crowns and veneers to a prescription from our dentists. The dentist plans your treatment, explains your options and fits the restoration, while the ceramist focuses on making it.

Does Core Dental have a ceramist and dental technician team?

Yes. Our team page lists a Ceramists and Dental Technicians group that includes Greg Karabasis, Agne Diliartaite and Phey Penayi, alongside dental prosthetists who support restorative and denture care.

Which treatments at Core Dental can involve ceramic work?

Treatments such as crowns, porcelain veneers and bridges may involve ceramic restorations. Whether they suit you depends on an examination, and our dentists explain the alternatives, risks, limits and fees before you decide.

How do I book crown or veneer treatment at Core Dental?

Call Core Dental on 13 13 16 or book online at coredental.com.au. Book with a dentist at any of our nine clinics, and they will examine you and explain whether a ceramic restoration is suitable.

Can I check a dentist's registration before treatment?

Yes. You can search the AHPRA register at ahpra.gov.au to confirm that a dentist, hygienist, therapist or prosthetist is registered. At Core Dental you can also ask your clinic team who is involved in your care.
